

# AI Ad Book Challenge

Individual Assignment / IXD5106 - All Sections

Instructor: Lev Markelov

In this assignment, you will create a fake brand and develop an advertising book featuring three drastically different ad concepts. You will use AI tools to generate your ads, then apply your design thinking to critique the results. The goal is to explore AI capabilities while demonstrating your ability to evaluate and improve upon AI-generated work.

## Deliverables

1. **Ad Book** containing your 3 ad variations (images, videos, or mixed media)
2. **Written Reflection** on your design critique
3. **3-Minute Loom Video** presenting your work (submitted to instructor)

## The Assignment

### Part 1: Create Your Brand

Invent a fake brand. Define:

- **The brand** — What is it? What does it sell or offer?
- **The target audience** — Who are you trying to reach?
- **The problem** — What pain point does your audience have?
- **The solution** — How does your brand solve it?

### Part 2: Create Your Ad Book (3 Variations)

Using AI tools, create three drastically different advertisements for your brand. Each ad should take a unique approach in format, medium, or context.

Examples of different approaches:

- Poster / print ad
- Social media post (Instagram, TikTok, etc.)

- Web banner or digital display
- Billboard or transit ad
- Unconventional placements — pencil wrapper, skywriting, hot air balloon, truck wrap, coffee sleeve, etc.
- Video or motion graphics

**Get creative!** Your ads can be static images, dynamic graphics, or even video. Use any AI tools you like — image generators, video tools, animation tools, etc. *Keep prompting until you are satisfied with the results.*

### **Part 3: Reflect & Critique**

After creating your ads, write a brief reflection addressing:

- What would you have done differently in each ad, and why?
- Where did the AI succeed? Where did it fall short?
- How would you improve these designs if you were to refine them further?
- What design principles or UX thinking informed your critique?

### **Part 4: Present Your Work (3-Minute Loom Video)**

(I want to see YOUR CAMERA ON + your presentation in the video)

[Record a 3-minute Loom video](#) presenting:

- **Your brand** — the audience, their problem, your solution
- **Your approach** — how you tackled this AI challenge, what tools you used
- **Your ad book** — walk through all three variations
- **Your critique** — what you would change and why

**The goal:** Explore what AI tools can do, and push them to create professional, on-brand work.

**Show off your design thinking.** This is your chance to demonstrate that you can evaluate and improve upon AI-generated work.

**Submit your PUBLIC Loom video link to the instructor via BB**
